

## Commercial Asphalt Maintenance

Workplace Health and Safety

Executive statement

At CAM we are committed to the safety and well being of all our employees. We want ensure that our employees can provide for themselves and return to their families unharmed after each and everyday worked. Our safety program is designed to eliminate or reduce any potential losses including worker illness and injury that may occur as a result of the day to day operation of the business.

To achieve this goal we endeavour to involve the entire workplace from the owner, to senior management, supervisors, occupational health committees, and workers. Management is committed to supporting the safety program.

There is an active hazard identification, analysis and control system in place. Regular inspections are conducted in order to monitor the system and verify hazards have been effectively dealt with.

Emergency Preparedness Plans have been outlined in the event the system fails and the organization needs to deal with emergencies. Investigations of incidents are done in order to identify where the system failed and make recommendations to correct it.

Formal training and on the job training are also an important part of the safety system at CAM.

A handwritten signature in blue ink, appearing to read 'Peter Van der...' with a stylized flourish at the end.

Commercial Asphalt Maintenance

Date: April.3/16
